Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The closest prior art fails to disclose or fairly suggest:

a) A delay circuit with a second switching leg including a second switched capacitor receiving a clock signal, in combination with the remaining claimed limitations, as called for in independent claim 1;

b) A delay circuit with a positive channel metal-oxide semiconductor (PMOS) switching leg including a second switched capacitor receiving a clock signal, in combination with the remaining claimed limitations, as called for in independent claim 9; and

c) A memory system for delaying a clock signal including a delay circuit utilizing a switched capacitor to provide a propagation delay, in which the delay element skews the clock signal versus data output from the memory element and the propagation delay of the delay circuit is a function of a ratio of an input capacitance and a switched capacitance, in combination with the remaining claimed limitations, as called for in independent claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
